(864)-633-7246 | brian.scott.poole@gmail.com | /in/brian-poole | github.com/bpoole5591 | brian-poole.com

— SKILLS —

JavaScript (ES6+) • React • Redux • Node • Express • MongoDB • HTML5 • CSS3 • Jest • Mocha
SQL • OAuth • Auth0 • AngularJS • Bootstrap • Git • Firebase • Passport

— PROJECTS —

Yelp Clone – Team-Developed Full Stack Web Application FEB 2018

React, Redux, Node, Express, Firebase, PostgreSQL – yelpclone.brian-poole.com

A full stack clone of Yelp.com

- Integrated the Yelp API and a RESTful API together to fetch business data and Google Maps to display location
- Utilized Firebase to provide user authentication and to store and access user data
- Held daily stand-ups with group of 4 to coordinate tasks

theMovieCollectionDatabase – Personally Developed Full Stack Web Application JAN 2018

React, Redux, Node, Express, PostgreSQL, OAuth, MongoDB, Stripe, Bootstrap – tmcdb.brian-poole.com

Create and maintain a record of your personal movie collection; Displays movie details from a third-party API

- Integrated the imdb-API to fetch movie detail data and the Stripe API to accept donations
- Utilized Redux to manage application state and redux-thunk middleware to make asynchronous http requests
- Integrated OAuth 2.0 in order to provide authentication and to access user data and MongoDB for data storage
- Won “Best Presentation” in my DevMountain cohort

Cryptocurrency Tracker – Personally Developed Full Stack Web Application DEC 2017

React, Node, Express – crypto.brian-poole.com

Track cryptocurrencies and their values in real time

- Utilizes a RESTful API to pull cryptocurrency values from a third-party API
- View is integrated with full CRUD capabilities
